

BLOQUEUR PETZL TIBLOC

https://www.securhit.com/en/pulleys-and-ascenders/494-559-bloqueur-petzl-tibloc.html#/521-couleur_b01-orange

Compact, lightweight PETZL TIBLOC rope clamp for rope ascents or setting up a haul rope. For ropes between 8 and 11 mm in diameter.

Description

Equipment for long-distance climbing requires the highest quality to ensure the user's safety. PETZL's TIBLOC rope clamp is ideal for climbing, mountaineering, caving and acrobatic work. This equipment greatly simplifies the life of experienced climbers and professionals specializing in work at height.

- Two types of use: rope-climbing rope clamp or hauling rope clamp
- A device for automatically positioning the carabiner as close as possible to the rope (initiating rope blocking).
- A small, lightweight piece of equipment that's easy to carry with you wherever you go
- Markings to simplify rope clamp installation
- Optimized operation of the rope clamp thanks to the pinned trigger and drain slot (to free the equipment from impurities)
- Stainless steel design to prevent corrosion and ensure durability

Concentrate solely on climbing, the TIBLOC rope clamp keeps you safe for the duration of your activity!

The blocker is compatible with all Petzl carabiner models except SPIRIT.
