

PANTIN CLEAT PETZL

https://www.securhit.com/en/pulleys-and-ascenders/495-561-taquet-de-pantin-petzl.html#/523-modele_b022-droite

PETZL PANTIN cleat for easy rope ascents. Essential for holding the rope in the pantin.

Description

Climbing a rope in an emergency, to rescue a person or for specific tasks, is a physical exercise. Certain equipment, such as the PETZL PANTIN cleat, can simplify operations. Its main role is to hold the rope in place during ascent, making rope access work safer, but also for activities such as caving.

- Immediate installation on the PANTIN foot rope clamp ensures that the rope stays securely in the equipment during rope ascents.
- Two models available: for right or left foot
- Stainless steel design, appreciated for its corrosion resistance and durability

An essential piece of equipment for perfectly locking the rope and ensuring safety for all during emergency interventions.

Caractéristiques

- Weight : 25 g
