

COMPACT FLOW METER DN 40

<https://www.securhit.com/en/robinetterie/5-debimetre-dsp40-sans-vanne-integree.html> For simultaneous measure of the dynamic pressure and flow of hydrants

Description

Device for simultaneous measure of the flow and pressure for hydrants and hose reels.

Compact stainless steel monoboc casing with control buttons.

Measure of the dynamic and static pressure from 0 to 16 bar with display on LCD screen.

Measure of the flow from 1 to 40 m³/h by digital display with an accuracy of 0.1 m³/h and volume counter feature.

Powering by lithium batteries for 10 000 hours of autonomy with display of the level status.

Quick-couplings depending on the use.

Weight 2.5 kg.

The flowmeter DC compact is available in diameter 30 or 40 mm and it is perfectly convenient for the control of hose reels.

Warranty 3 years.

Caractéristiques

- Weight : 2.5 kg
- Static and dynamic pressure : De 0 à 16 bar
- Flow : 1 à 40 m³/heure
