PETZL VIZEN VISOR

https://www.securhit.com/en/helmets-and-accessories/501-visiere-vizen-pour-casque-secours-petzl.html

PETZL VIZEN , a complete visor for eye and face protection against the risk of electric arcs. EASYCLIP system for VERTEX and STRATO helmets.

Description

For certain types of work in industry, mechanical engineering or construction, it's essential to protect your face with suitable, reliable protective equipment. PETZL's VIZEN visor combines safety and excellent visibility to protect against the risk of electric arcs and short-circuits when working at height and/or outdoors.
Ultra-reliable eye and face protection
- A visor that covers the entire face
- Completely transparent to avoid impairing vision
- Wide field of vision (180°)
- Extremely lightweight, thanks to the use of polycarbonate
- Anti-scratch and anti-fog treatments
- Possibility of wearing prescription or safety glasses with the visor
Compatible with VERTEX (minimum 2019 version) and STRATO helmets
- Fits in seconds with the EASYCLIP attachment system (clip the visor to either side of the helmet using the side inserts supplied)
- Alternate between work and storage positions with a quick-change mechanism
Please note: the visor is not a protective mask for arc welding.
