PETZL RESCUCENDER rope clamp for use in hauling systems as a pull or anti-reverse system. With openable cam for placement or removal at any point on the rope.

Description

Cam-type rope clamps are essential safety equipment for professionals working at height or in high-risk situations. The camlock offers reliable protection against falls. Whether you're a mountaineering professional, a construction worker or a caver, PETZL's RESCUCENDER is an essential piece of equipment for everyday use.

- A cam that can be opened to insert or remove the rope clamp at any point on the rope.
- Easy opening with reduced risk of accidental release thanks to independent catches on the sides of the device (with indicator in case of non-locking).
- Easy-to-handle cam
- Large-diameter connection hole for improved carabiner rotation
- Longer service life and reduced risk of snagging thanks to built-in cam spring.

3-year warranty.
