

PETZL RING2RING ACCESSORY

<https://www.securhit.com/en/harnesses-and-belts/507-accessoire-ring2ring.html>

Rigid double PETZL RING2RING adapted for leg harnesses with textile bridles. Ideal for helicopter rescue operations and simplifying access to the connection point.

Description

Some operations require ultra-reliable equipment to ensure everyone's safety. This is particularly true of helicopter rescue operations, where caution is of the essence when rescuing a person in danger. PETZL's RING2RING provides an additional safety solution.

A device that doubles the textile ring:

- A better way to organize the assembly of equipment (lanyard, ascender, descender, etc.).
- A more rigid ventral attachment point to optimize positioning and simplify karabiner attachment
- Possible orientation under tension
- Possibility of connecting a harness if suspension lasts longer than expected

Equipment specially designed for helicopter rescue:

- A small ring to enable the winch operator to easily walk alongside the rescuer inside the helicopter.
- A larger diameter ring, capable of supporting heavier weights such as backpacks.

Large ring strength: 23 kN

Small ring strength: 33 kN

Inside diameter of large ring: 46 mm

Inside diameter of small ring: 31 mm

Caractéristiques

- Weight : 100 g
- Materials : aluminium, plastique
- Certifications : CE EN 362 type M, CE EN 12275 type Q, UKCA, EAC
