

GAS FLANGE FIRE GENERATOR

<https://www.securhit.com/en/fire-simulation/51-generateur-de-feu-bride-gaz.html>

Safely and quickly simulate a flange fire with real fire

Description

The Stand-alone Flange Fire is manually ignited by means of an independent (exclusive) fire starter. The gas hose is equipped with a pressure handle that allows the gas supply from the cylinder to be adjusted and shut off just as quickly. The Flange Fire is an excellent training tool for hazardous material accidents. Its clever design makes it easy to pack and move in the supplied synthetic case, with its compact dimensions of 60 x 40 x 44 cm for transport. The accessory is made of high quality stainless steel.
