PETZL FALCON ASCENT sit harness with two-part ventral attachment point. Lightweight equipment for maximum comfort during rescue operations and work at height.

### Description

The PETZL FALCON ASCENT harness combines ease of use and safety for rescue and rope access work. It adapts to all situations and allows a great deal of freedom of movement.

Ergonomic equipment:

- Quick adjustment with DOUBLEBACK PLUS self-locking buckles
- Fast installation thanks to FAST LT buckles on the thigh straps
- TOP CROLL L torso can be installed using the metal buckle on the back of the harness
- Five gear loops and two tool loops

Appreciable comfort:

- 3D foam padding on waist and thigh straps
- Textile side attachment points for occasional use

Ideal for working at height:

- A two-part ventral attachment point to be closed with an OMNI carabiner or an openable RING OPEN ring
- Possibility of connecting a CROLL belay device
- Easy ascent on the rope thanks to the low position of the rope clamp
- PODIUM harness attachment thanks to strap loops independent of those of the attachment point

3-year warranty
