Lightweight, top range helmet for all vertical activities

Description

A lightweight, extremely comfortable helmet that provides complete protection for all vertical activities. With its 22 openings, it provides excellent ventilation for prolonged use and when the temperature rises during mountaineering.
The 2 sizes have been optimised to guarantee a wide range of adjustment, while the interior padding and low-position adjustment system ensure the helmet remains stable even when the head moves abruptly.
The STORM helmet is available in 6 colours.

Caractéristiques

- Weight : 230 - 250 g
- Norme : EN 12492
