PETZL KNEE ASCENT LOOP PEDAL

https://www.securhit.com/en/pulleys-and-ascenders/562-pedale-knee-ascent-loop.html

PETZL KNEE ASCENT LOOP pedal with foot loop to simplify single rope climbing in pruning. For use with the Prusik mechanical, ZIGZAG or ZIGZAG PLUS.

Description

Pruning is one of those jobs that requires equipment to enhance safety and facilitate sometimes perilous interventions. PETZL's KNEE ASCENT LOOP pedal makes single rope climbing easier when pruning.

Easier climbing on single ropes:

- A top sling connected to the mechanical Prusik to link the ZIGZAG or ZIGZAG PLUS and CHICANE rope assemblies.
- A built-in CROLL L rope clamp to make climbing more comfortable (to be completed with a PANTIN foot clamp)
- A lower Dyneema strap with a foot loop for better foot support

Easy to install:

- Carabiners and adjustment buckles for quick installation
- TOOLBAG 1.5 tool pouch to keep the device handy at all times
- An opening cleat to simplify installation of the CROLL L clamp

Durable equipment thanks to the possibility of changing the mechanism's parts.
Rope diameter: between 8 and 13 mm.

Caractéristiques

- Weight : 280 g
- Materials : aluminium, acier, polyamide, polyester
