

EVACUATOR PETZL EXO AP HOOK 15M

<https://www.securhit.com/en/belay-and-descenders/564-evacuateur-petzl-exo-ap-hook-15m.html>

Evacuator PETZL EXO AP HOOK 15M, individual evacuation system with mooring hook. Indispensable when no anchor point is available.

Description

The PETZL EXO AP HOOK 15M evacuator is an indispensable system if there's no anchor point. It is used in two situations: around a structure, immobilized by a locking loop, or on a windowsill if there is no other possible recourse.

A self-braking anti-panic system ideal for certain situations:

- rapid horizontal movement
- The ability to pass through a window
- An anti-panic mode to automatically brake and stop the descent in the event of great force being exerted on the handle.
- Reducing the shock of a fall

The 15 m long, 7.5 mm diameter aramid fiber static rope is resistant to abrasion and high temperatures. The Am'D connector with CAPTIV clip holds the connector in the right position. The bag makes it easy to transport the device by attaching it to the harness.

The product is also available in various rope lengths and other connector types on request.

Caractéristiques

- Weight : 1470 g
- Materials : aramide, aluminium, acier inoxydable, polyamide, acier

- Maximum working load : 140 g
- Certifications : NFPA 2500 Escape Use
