MICROWAVE MODULE FOR VESTA GENERATOR

https://www.securhit.com/en/fire-simulation/57-module-micro-ondes-pour-generateur-vesta.html

Accessory module adjustable on fire generator Satellit compact.

Description

The Microwave Accessory is designed so that the participant can see at a glance that it is a microwave or combination oven.
In addition, the door operates as you would expect from a real appliance; it opens with a push button and locks when closed. This accessory is made of quality stainless steel.
Inside is a flashlight, which emits a flame from the top when lit. By opening the door, the instructor adds an extra dimension. Both foam (training) and CO2 extinguishers can be used for training. We do not recommend extinguishing with powder.
This accessory is designed in a very practical way. After the exercise, the Microwave Accessory is stored in a plastic transport box.

Caractéristiques

- Weight : 14.26 kg
- Transport box size : 60 x 40 x 32,5 cm
