# PETZL WIRE STROP STEEL MOORING SLING

*https://www.securhit.com/en/anchors-and-tie-back-systems/571-704-amarrage-petzl-wire-strop-acier.html#/658-longueur_g200aa-50_cm*

PETZL WIRE STROP ACIER lashing, galvanized steel lashing sling with two different sized ends. Five lengths available. Durable, galvanized steel equipment.

## Description

Moorings are often used in climbing and mountaineering to secure anchor points or to build belay systems. PETZL's WIRE STROP steel anchor combines strength and durability for increased safety when working at height.

Solid design with :

- Galvanized steel (corrosion-resistant, easy to maintain and reliable)
- Polyurethane sheathing with anti-UV treatment

Distinctly sized ends offer several possibilities for installing a mooring:

- On an anchor
- Around a mooring structure
- Lark's head on a mooring structure, using attachment points of various sizes

Easy-to-handle equipment:

- Excellent connector retention in the right position and easy snap-fastening with the plastic sheath
- Individual identification markings enable you to monitor the device throughout its use

Available in five different lengths: 50 cm (220 g), 100 cm (320 g), 150 cm (420 g), 200 cm (520 g) and 300 cm (720 g).

The PETZL WIRE STROP is not EN 13414 compliant.

## Caractéristiques

- Materials : acier galvanisé, acier inoxydable, aluminium, polyuréthane
- Breaking load : 23 kN
- Certifications : CE EN 795 B, TS 16415 (usage à deux personnes), NFPA 2500 Technical Use, ANSI Z359.18, CE EN 354, UKCA, GB 30862 / B, XF494: FZL-B-Q
