PETZL IGUANE 25 CM LANYARD

https://www.securhit.com/en/lanyards-and-absorbers/579-728-longe-petzl-iguane-25-cm.html#/682-taille_l001aa-25_cm

PETZL IGUANE 25 CM or 35 CM lanyard for simple hoisting from the ground and easy handling thanks to color-coding. Available in two different lengths.

Description

Heli-lifting is a rescue/transfer operation often used in situations where land access is difficult or impossible, such as in the mountains. The person being lifted or lowered to or from a helicopter must be able to benefit from a safe intervention. PETZL's IGUANE lanyard is the ideal equipment for heli-lifting, thanks to its many strong points.

- A large-diameter hole in the metal part for rapid connection to the helicopter winch.
- Two strands to link both victim and rescuer with two VERTIGO TWIST-LOCK karabiners
- Am'D TWIST-LOCK carabiner on metal body for stretcher connection
- Different colors for the connection systems, to identify them at a glance
- Easy carabiner attachment thanks to connectors held in position

PETZL's IGUANE lanyard comes in two sizes:

- A short version (25 cm, 390 g) designed for connection to the sternal point of the harness
- A long version (35 cm, 395 g) designed for use with a stretcher.
