Adjustable PETZL GRILLON U work positioning lanyard for a comfortable work position. Available in 7 lengths. For single or double use.

Description

Working at height must combine safety and comfort. Especially if you're going to be working at height for a long time. The PETZL GRILLON U lanyard is an effective way of ensuring a comfortable working position. Its progressive adjustment system makes it easy to adjust the lanyard to the precise length required for the job in hand.

The lanyard can be used twice on the harness's lateral attachment points when the professional is working with his or her feet supported. The pivoting cam allows adjustment for better weight distribution at belt level.

Alternatively, the lanyard can also be used single-handed on the harness's ventral attachment point when the professional is under the mooring. In this way, the load is distributed between the belt and the thighs. The handle allows this adjustment.

The lanyard has other advantages:

- A plastic sheath and sewn endings to hold the connector in position and protect the rope from abrasion.
- A protective sheath (which can be removed) to counteract aggressive points of contact and allow the rope to slide more smoothly
- Simple length identification at the connector end of the rope (coloured label).

The lanyard is available in two colors: white/yellow or black.

Caractéristiques

- Materials : polyamide, polyester, aluminium
- Certifications : ANSI Z359.3, CSA Z259.11, CE EN 358, CE EN 12841 type C, EAC, UKCA, GB 24543 / WQX
