Adjustable PETZL GRILLON HOOK work positioning lanyard with HOOK connector for double use on lateral harness attachment points. Certified to European and Russian standards.

Description

When working at height, comfort is paramount. The European version of the PETZL GRILLON HOOK lanyard features a progressive adjustment mechanism, which enables the lanyard to be precisely adjusted to the length required to achieve the most comfortable position for the worker. This equipment also has other advantages for working at height.

- Double use on the harness's lateral attachment points when the professional is carrying out his tasks with his feet supported. The result: a more evenly distributed load on the belt. Simply press the pivoting cam to adjust.
- The connector is perfectly held in position, and the plastic sheath and sewn endings protect the rope from abrasion.
- HOOK connector allows the lanyard to be used twice on the lateral attachment points of the harness.
- Quick identification of the length at the connector end of the rope (coloured label).

The lanyard is available in 4 different lengths: 2 m (635 g), 3 m (715 g), 4 m (795 g) and 5 m (875 g). 3-year warranty.

Caractéristiques

- Materials : polyamide, polyester, aluminium
- Certifications : CE EN 358, CE EN 12841 type C, EAC, UKCA
