

STOP PETZL DESCENDER

<https://www.securhit.com/en/belay-and-descenders/586-descendeur-autofreinant-petzl-stop.html>

STOP PETZL caving descender with assisted braking for controlled descent. Stainless steel equipment. For semi-static ropes 8.5 to 11 mm in diameter.

Description

Caving requires reliable equipment for safe expeditions. PETZL's STOP descender provides excellent control during rock exploration.

- Assisted braking system
- Simplified rope maneuvering for the passage of fractures
- Ergonomic handle for a comfortable grip and descent
- Easy rope release
- Markings to guide installation on the descender
- Easy rope installation thanks to locking ratchet
- The FREINO Z carabiner can be turned around thanks to the long connection hole
- Durable stainless steel design

The STOP descender is captive and compatible with semi-static ropes from 8.5 to 11 mm.
