PETZL HELITACKING LANYARD LEZARD

https://www.securhit.com/en/lanyards-and-absorbers/592-interface-d-helitreuillage-lezard-petzl.html

PETZL LEZARD HELITREUILLAGE lanyard with safety device for lifting and lowering. Easy handling with color-coding and adjustable rope with ADJUST locking device.

Description

Heli-lifting is an extremely delicate operation, requiring a combination of caution and safety. That's why it's vital to equip yourself with reliable, sturdy accessories. PETZL's LEZARD LIFT Lanyard is specially designed for heli-lifting at height.

- A large hole on the metal part for direct connection to the helicopter winch.
- An easy-to-adjust strand for easy connection to the relay (instant ejection if the helicopter abruptly leaves its stationary position)
- Lower double strand designed to link rescuer and rescued person
- A snap hook on the metal body for stretcher connection
- Connecting elements in different colors for easy identification
- Ergonomic ADJUST locking device for precise adjustment of the length of the adjustable strand
- Connectors held in position to simplify snap hooking
- A semi-static rope lanyard to ensure optimum release (use only if the fall factor is less than 1).

Warning: use of the LEZARD lanyard requires training from PETZL or an approved organization.

LEZARD was developed by Petzl on the basis of a patent registered by Jean-Louis Rocourt.
