

MOBILE FALL ARRESTER FOR GOBLIN ROPE

<https://www.securhit.com/en/pulleys-and-ascenders/60-antichute-mobile-pour-corde-goblin.html>

Goblin fall arrester delivered with an oval steel carabiner.

Description

Innovative mobile fall arrester on rope that works both up and down and can be installed on static 10 to 11 mm rope, including when taut and under load.

Very smooth operation in both directions, thanks to the stainless steel cam mechanism, with no aggressive pins and therefore very little wear on the rope.

Low damage to the equipment in connection with this fall arrester due to its low impact force at the time of stopping.

Two operating modes can be easily selected by a simple button: sliding fall arrester or blocker.

The Goblin is certified for individual use up to 120 kg and for emergency use up to 200 kg.

Caractéristiques

- Total weight : 460 g
