

OMNIBLOCK SWIVEL PULLEY 1.5

https://www.securhit.com/en/pulleys-and-ascenders/602-810-poulie-emerillon-omniblock-15.html#/726-option_p51-double/727-couleur_p51-noir

Lightweight and compact Omniblock 1.5 swivel pulley

Description

The Omniblock pulley is designed so that it can be opened even when wearing gloves, so the rope can be installed or removed while keeping the pulley connected to its anchor.

Attach, install and remove ropes with one hand.

The side panel lock features a two-stage, double-locking safety mechanism.

The rotation mechanism allows the pulleys to be positioned correctly in relation to the load and reduces the height of the device by combining.

The pulley and swivel are integrated into a single unit.

The sheave is mounted on high-efficiency ball bearings.

CMU : 8 kN / 800 kg
CE : YES
Standard : EN 12278

Available in single or double.
Colours available: Black and Orange.

Caractéristiques

- Breaking load : 36 Kn
- Diamètre de corde max : 13 mm
- Poids poulie simple : 260 g
