PETLZ GO 7 MM LINK

https://www.securhit.com/en/carabiners-and-connectors/613-maillon-rapide-petzl-go-n7.html

PETLZ GO 7 MM steel quick link, oval-shaped. A compact, practical safety device for maneuvers and abseiling. Virtually permanent mooring.

Description

For maneuvers and abseiling, safety is paramount. PETZL's GO 7 MM quick link is a reliable and practical addition to your safety equipment when working at height. Its oval shape makes it highly resistant in different axes. When closed with a key, it transforms into a quasi-permanent mooring ring.

Its steel design promises great reliability. This material is particularly appreciated for its shock resistance and sturdiness. The GO quick link can therefore be used in harsh environments.

Large axis resistance: 25 kN.
Small axis resistance: 10 kN.
Opening: 16 mm.

Caractéristiques

- Material : Acier
- Certifications : CE EN 362 type Q, GB/T 23469
