PETZL TANDEM SPEED PULLEY

https://www.securhit.com/en/pulleys-and-ascenders/616-poulie-double-petzl-tandem-speed.html

PETZL TANDEM SPEED double pulley with high performance for rope zip lines. Personal protective equipment (PPE) against falls from height.

Description

All work at height requires personal protective equipment (PPE) against falls. PETZL's TANDEM SPEED double pulley with fixed flanges is specially designed for rope-assisted zip-lining or hauling. It offers interesting advantages for these operations:

- Sheaves designed in stainless steel, a material that is both ultra-resistant and durable.
- Excellent performance thanks to sheaves mounted on sealed ball bearings
- Up to three carabiners can be attached to simplify manoeuvring.

Note: the ball bearings on the TANDEM SPEED pulley allow higher speeds than the self-lubricating bushings on the TANDEM.

For rope diameters up to 13 mm.
Sheave diameter: 27.5 mm.
Efficiency: 95%.
Maximum working load: 10 kN.
Maximum authorized speed: 20 m/s.

Caractéristiques

- Weight : 270 g
- Certifications : CE EN 12278, UKCA
