PETZL ROLLCAB CASTOR

https://www.securhit.com/en/pulleys-and-ascenders/619-poulie-pour-sauvetage-teleporte-petzl-rollcab.html

PETZL ROLLCAB cable castor, specially designed for moving and evacuating on ski lift cables. To be combined with a back-up lanyard.

Description

Working at height and in high-risk environments calls for ultra-reliable equipment. PETZL's ROLLCAB castor is one of the essential pieces of equipment for successful work on ski lift cables.

With its wide opening and large-diameter sheave, this device can be used on a variety of ropes (up to 55 mm in diameter). The ROLLCAB castor must be combined with a back-up lanyard during travel.

Maximum working load: 5 kN.

Caractéristiques

- Weight : 1470 g
- Height : 47 cm
- Certifications : CE EN 1909
