PETZL PRUSIK MINI PULLEY

https://www.securhit.com/en/pulleys-and-ascenders/621-poulie-petzl-prussik-mini.html

Lightweight, high-performance PRUSIK MINI pulley from PETZL. Ideal for non-return assemblies with flanges suitable for using a Prusik self-locking knot.

Description

PETZL equipment is designed to enhance safety in high-altitude environments. The aim: to protect professionals in the exercise of their profession. The PRUSIK MINI pulley offers additional safety via the creation of non-return mounts. Key features :

- Special flanges, ideal for use with Prusik self-locking knots in non-return systems
- High efficiency (91%) thanks to sealed ball-bearing sheaves
- Compact, lightweight equipment (80 g)
- Compatible with rope diameters from 7 to 11 mm

Maximum working load: 2.5 kN x 2 = 5 kN.

Caractéristiques

- Sheave diameter : 25 mm
- Certifications : CE EN 12278, NFPA 2500 Technical Use, UKCA
