PETZL PRUSIK GEMINI PULLEY

https://www.securhit.com/en/pulleys-and-ascenders/624-poulie-prussik-petzl-gemini.html

Lightweight, high-performance PETZL PRUSIK GEMINI double pulley. A compact, practical device for creating non-return assemblies with a high load ratio.

Description

Smaller equipment is appreciated when working at height. Like PETZL's PRUSIK GEMINI pulley, a practical and efficient device for non-return assemblies, with a good load reduction ratio.

- Flanges designed for use with Prusik self-locking knots in anti-reverse devices
- Multiple reeving options thanks to parallel-mounted sheaves and additional attachment point.
- High efficiency (91%) thanks to sheaves on sealed ball bearings
- appreciable lightness and compactness

Maximum working load: 2 x 1.5 kN x 2 = 6 kN.

Caractéristiques

- Weight : 135 g
- Sheave diameter : 25 mm
- Certifications : CE EN 12278, NFPA 2500 Technical Use, UKCA
- Compatibilité corde : 7 à 11 mm
