

PETZL HARNESS FOR SEQUOIA® AND SEQUOIA® SRT

<https://www.securhit.com/en/harnesses-and-belts/631-sellette-petzl-pour-sequoia-et-sequoia-srt.html>

PETZL harness for SEQUOIA® and SEQUOIA® SRT harnesses, ideal for work at height with comfortable suspension. For connection to pruning harnesses.

Description

Working at height can sometimes take many hours. The SEQUOIA® and SEQUOIA® SRT harness harness is specially designed for the comfort of pruners. In addition to its pleasantly wide seat, it offers numerous advantages for work in treed areas.

- The ability to adjust the width of the harness to move more easily between forks and tree branches.
- DOUBLEBACK self-locking buckles for quick line adjustment
- Simple back positioning when the harness is not being used for suspension work

The practical harness connects to the opening points of the SEQUOIA® and SEQUOIA® SRT harnesses, using the two shackles (part no.: C087AA00).

Caractéristiques

- Weight : 920 g
- Materials : aluminium, polyester, plastique
