

AD ALU EXTENSION LADDER 2 SECTIONS 4.6 X 8.10 M / 3 PERSONS / LATERAL ROPE

<https://www.securhit.com/en/echelles/64-echelle-a-coulisse-ad-alu-2-plans-46-x-820-m-3-personnes-corde-laterale.html> Extension ladder with two sections

Description

The extension ladder has a robust and light construction thanks to the ergonomic stiles with rounded edges.

The rungs, which have a flat surface and are serrated with Ultragrip®, are screwed into the stiles and can be replaced thanks to the patented connection system.

There is an integrated polyamide runner with replaceable rubber anti-slip pads. Shaped to fit the profile to prevent tearing.

The ladder has a high inertia aluminium profile with a radial shape for better ergonomics, a water drainage vent, a hydrophobic deployment rope Ø 10 mm, strength 1800 daN, a riveted nameplate marking (production batch and contractual information) and an integrated runner guide equipped with frictionless glides.

EN 1147-2010 - Marking 3 people

NIT 331

Full certificate of conformity from LNE.

Caractéristiques

- Weight : 31 kg
- Capacity : 3 personnes
- Folded length : 4.6 m
- Extended length : 8.2 m
