Comfortable PETZL AVEN caving harness with reinforced foam belt. An ultra-sturdy, reliable piece of equipment that lets you enjoy your activities with complete peace of mind.

### Description

Looking for maximum comfort during your caving outings? The AVEN caving harness from PETZL is your ally for caving in total peace of mind.

Ultra-comfortable equipment

- Closed-cell foam (no water absorption) in the waistband for greater comfort.
- Wide thighbands for better weight distribution between thighs and pelvis, with buckles positioned at crotch level to limit potential snagging
- The thigh straps can be locked in place with the support accessories.

High resistance

- Thermoplastic polyurethane (TPU) reinforcements on thigh straps
- Polyester-reinforced waistband
- High-density polyethylene (HDPE) for material holders, ring and attachment point reinforcement
- Anti-wear protection of rear buckle by strap flap

Optimal rope climbing

- Low position of attachment points for optimum rope climbing performance
- Three gear loops, on the left and right of the harness
- Two loops for CARITool tool holders

PETZL's AVEN harness comes in two sizes, recognizable by the color code (yellow stitching for size 1 and black stitching for size 2).

**Model 1**

Waist 60-86 cm, thigh 42-62 cm, weight 465 g

**Model 2**

Waist 80-102 cm, thigh 52-72 cm, weight 520 g
