PETZL MACCHU harness for children under 40 kg. Fully adjustable and very comfortable for safe climbing sessions.

Description

The little ones have their own climbing gear! PETZL's MACCHU sit-harness is perfect for starting climbing at an early age. Practical, it can be adjusted to your child's growth (up to 40 kilos) thanks to its wide range of settings. We appreciate this equipment for its other benefits during climbing sessions.

- DOUBLEBACK buckles on waistband and thighs for easy adjustment
- ENDOFRAME technology for better weight distribution at the waist and thighs
- Padded waistband and thigh loops for maximum comfort
- Two tie-in points and a colored belay ring for quick verification of the belayer's connection point
- Two rigid gear loops at the front and a buckle at the back (handy for attaching chalk bag)
- Removable elastics at the back

The PETZL MACCHU harness needs to be complemented with BODY comfort straps to ensure the safety of children with less pronounced hips.

Waist: 54-64 cm, thigh: 34-44 cm, weight: 335 g.
