PETZL GRILLON HOOK U adjustable work positioning lanyard with HOOK connector. Certified to North American and European standards. Four lengths available: 2, 3, 4 or 5 m.

Description

When working at height, the comfort of professionals is a point not to be overlooked. The international version of the PETZL GRILLON HOOK lanyard features a progressive adjustment mechanism, ideal for fine-tuning the length needed for a comfortable working position. This feature offers further advantages when working at height.

- Double use on the harness's lateral attachment points when the worker is carrying out foot-supported tasks. The result: a more evenly distributed load on the belt. Simply press the swivel cam for quick adjustment.
- The plastic sheath and sewn-on endings ensure that the connector remains in position and protect the rope from abrasion.
- A sheath to protect against sharp contact points.
- A HOOK connector designed to use the double lanyard on the harness's lateral attachment points.
- Length identification at a glance, on the end of the rope that receives the connector (colored label).

The lanyard is available in 4 different lengths: 2 m (770 g), 3 m (850 g), 4 m (930 g) and 5 m (1010 g). 3-year warranty.
