Adjustable PETZL GRILLON MGO U work positioning lanyard with MGO connector. To be used in conjunction with a fall arrest device. Available in 2 lengths.

Description

Working at height requires robust, durable equipment to ensure the safety of professionals. That's why the PETZL GRILLON MGO U lanyard is essential for creating a reliable fall arrest system.

- A progressive adjustment system to precisely adapt the length required to find the best position at the workstation.
- Single use on the harness's ventral attachment point if the professional is below the anchorage point (better weight distribution between belt and thighs).
- A plastic sheath at the ends to prevent abrasion and keep the connector in position
- MGO wide-opening connector
- Color-coded label for instant indication of lanyard length

The PETZL GRILLON MGO U lanyard is available in two lengths, 2 metres (1220 g) and 3 metres (1300 g).
