Adjustable PETZL GRILLON PLUS U work positioning lanyard with high abrasion resistance. To be used in conjunction with a fall-arrest system. For single or double use.

Description

When working at height, safety is a must. The PETZL GRILLON PLUS U adjustable work positioning lanyard is the perfect complement to a fall arrest device, ensuring the safety of professionals. An ideal product for high-risk environments, thanks to its many strong points:

- Comfort, thanks to the progressive adjustment system used to adapt the length of the lanyard, ensuring the best position for the task in hand.
- High abrasion resistance thanks to the aramid fiber rope
- Two ways of using the lanyard: double on the lateral attachment points of the harness when the worker is working on his feet (adjustment with the swivel cam) or single on the ventral attachment point of the harness when the worker is under the mooring (adjustment with the handle)
- A plastic sheath over the lanyard's sewn ends to prevent abrasion and hold the connector in place
- Color-coded label to identify lanyard length at a glance

The lanyard is available in two lengths: 2 metres (435 g) and 3 metres (515 g).
