PETZL FREINO Z carabiner with braking lug for descenders, designed to adjust braking during descent. Compatible with I'D S, I'D L, I'D EVAC and RIG self-braking descenders.

## Description

Do you regularly work at height? Safety equipment is essential for trouble-free work every day. The FREINO Z carabiner from PETZ is specially designed to ensure your safety when descending.

- Better control of the descent if the loads are heavier, thanks to the ergot (in the case of a two-person rescue, for example).
- Easy insertion of the rope into the braking lug.
- Keylock system to prevent the carabiner from snagging
- TRIACT-LOCK automatic locking system with triple-action release
- The ability to use the carabiner on a harness or anchor
- The ability to make the I'D S, I'D L and I'D EVAC (versions from 2019) or RIG (versions from 2018) self-braking descenders captive during transfer from the gear rack to the ventral attachment point or anchor

Long axis resistance: 23 kN

Short axis and open finger: 8 kN

## Caractéristiques

- Weight : 75 g
- Material : Aluminium
- Certifications : CE EN 362, CE EN 12275, EAC, NFPA 2500 Technical Use, UKCA, GB/T 23469 / B
