PETZL EASHOOK OPEN connector designed with an openable connection point. Ideal for double lanyards and work positioning lanyards. With automatic locking system.

Description

Need practical, reliable equipment for work at height? PETZL's EASHOOK OPEN connector is specially designed for use at the end of double lanyards such as ABSORBICA-Y, PROGRESS or PROGRESS ADJUST. It is also suitable for work positioning lanyards such as the GRILLON.

Its practical removable connector fits directly onto the lanyard. It can be reused if the lanyard is damaged. Its excellent ergonomics make it easy to hold.

The connector features a double-action automatic locking system, a wide opening and a Keylock system (practical for preventing accidental snagging). Its H-shaped design improves the strength/lightness ratio, while protecting the markings from potential abrasion.

PETZL's EASHOOK OPEN connector is available in black or gray.

Long axis resistance: 25 kN
Open finger resistance: 10 kN
