

PETZL VULCAN CONNECTOR

https://www.securhit.com/en/carabiners-and-connectors/670-954-connecteur-petzl-vulcan.html#/870-modele_m073-screw_lock

PETZL VULCAN asymmetrical carabiner for harsh environments. Heavy-duty, high-capacity equipment, ideal for multiple rigging. Two locking systems.

Description

In tough working environments, equipment strength is a top priority for enhanced safety. PETZL's VULCAN asymmetrical carabiner is an essential element for safe work at height.

- Designed in solid, shock-resistant steel
- Multiple attachment options
- Easy rotation and limited risk of stable points thanks to the fluid interior design
- Keylock system prevents accidental snagging of the carabiner
- Can be combined with the CAPTIV barrette (low risk of overturning and greater load on the carabiner along the long axis)
- Excellent strength/lightness ratio and abrasion-resistant markings thanks to the H-shaped carabiner format
- Choice of TRIACT-LOCK automatic triple-action opening or SCREW-LOCK manual screw-lock (visual indicator if carabiner is not locked)

Available in European or international versions, in black or gray.

Weight: between 235 grams and 265 grams depending on model.

Long axis resistance: 45 kN

Small axis resistance: 16 kN

Open finger strength: 18 kN
