Lightweight, high-capacity asymmetrical PETZL WILLIAM carabiner. Available with three types of locking: two automatic systems, TRIACT-LOCK and BALL-LOCK, and a manual system, SCREW-LOCK.

Description

Looking for a great carabiner that's both practical and ultra-reliable? PETZL's WILLIAM carabiner is an asymmetrical, pear-shaped carabiner with a very large capacity. A model that offers several advantages:

- Large opening
- Simple connection of different equipment
- half-cabestan possible in case of failure on a route
- Lightweight, durable aluminum design
- Easy carabiner rotation thanks to interior design
- Keylock system to prevent unintentional snagging
- H-shaped profile for excellent strength to weight ratio and to protect markings from abrasion

The WILLIAM carabiner is available with three different locking systems:

TRIACT-LOCK: automatic triple-action opening system
BALL-LOCK: automatic triple-action opening system, with locking indicator
SCREW-LOCK: manual screw system with red visual indicator if carabiner is not locked.

Three colors: black, gray or gold.
Opening: 27 or 28 mm depending on model.
Weight: between 85 and 90 grams depending on model.
