PETZL BOLT STUDS (SET OF 20)

https://www.securhit.com/en/anchors-and-tie-back-systems/682-994-goujons-bolt-petzl-lot-de-20.html#/910-modele_p36g-10_mm_acier

PETZL BOLT studs in steel for indoor or occasional use (BOLT STEEL model) or traditional outdoor environments (BOLT STAINLESS model). Pack of 20 studs.

Description

Certain elements play an important role in ensuring safety when working at height or in high-risk environments. PETZL's BOLT stud is an indispensable accessory. It takes the form of a small rod-shaped mechanical part, useful for completing the system with PETZL's BOLT core plate.

The BOLT STEEL model, in steel, is mainly used indoors, in climbing gyms for example, or for occasional work.
The BOLT STAINLESS, in 316L stainless steel, is used outdoors, in an environment that does not cause stress corrosion.

Both types are available for 10 or 12 mm diameter inserts.

Weight: 45 grams for the 10 mm diameter model, 80 grams for the 12 mm diameter accessory.
