PETZL SWIVEL swivel on sealed ball bearings. Excellent performance, designed to prevent rope twisting when the load tends to rotate.

Description

Accessories make a difference in high-risk operations. Particularly when working at height. PETZL's SWIVEL swivel is specially designed to prevent ropes from twisting when a load tends to turn on itself.

With its maintenance-free, sealed ball bearing, the swivel offers excellent performance. The result: a high level of reliability for operations in sometimes harsh environments.

The swivel is available in two sizes:

- SWIVEL S (95 g), compact equipment designed to support one person
- SWIVEL L (150 g), capable of supporting two people, with a maximum of three connectors to be attached to the ends.

Breaking load: 23 kN (size S) and 36 kN (size L).
The PETZL SWIVEL swivel is available in two colors: black and black/red.
