PETZL AIRLINE JET CORD

https://www.securhit.com/en/ropes-and-cords/687-1006-cordelette-de-jet-petzl-airline.html#/922-longueur_r02y-60_m

PETZL AIRLINE jet cord for precise casting, without knots when leaving the bag. Two lengths available, 60 and 300 meters.

Description

Practical accessories such as PETZL's AIRLINE jet cord allow you to install a rope from the ground. Combined with the throwing bag, it makes it easy to install the rope. We like its various strong points:

- A thread that's both flexible and rigid, for precise casting while preventing the creation of knots on leaving the bag.
- A Dyneema® braid bonded to the core to maintain the cylindricity of the cord and ensure easy sliding in the tree.
- Lightweight equipment
- High visibility thanks to its yellow color

AIRLINE jet cords are available in two lengths: 60 and 300 meters.
