PETZL JET throwing bag with double thickness and contoured shape for easy passage through tree forks. Durable equipment with three different weights (250, 300 or 350 g).

Description

PETZL's JET throwing bag is an essential piece of equipment for pruners. It offers a number of advantages when working at height:

- Resistant, double-layered design for long-lasting durability
- Streamlined shape for easy passage through tree forks
- Bags with different weights to suit different needs, recognizable by the distinct colors of the strap seams
- Quick rope attachment thanks to secondary connection point
- Yellow color for visibility in the trees

The JET bag is available in three versions: 250, 300 and 350 g.
