PETZL SIMPLE caving descender. Lightweight, easy-to-handle equipment for use with 8.5 to 11 mm diameter semi-static ropes.

Description

Need to progress in tight spaces? PETZL's SIMPLE caving descender is a practical and ultra-reliable piece of equipment for safe descents. Its compact size and maneuverability make it easy to use in all circumstances.

- Easily controlled descent speed by adjusting the force exerted on the rope's free end
- Simple rope installation thanks to the diagram on the descender and the locking catch on the opening flange
- Large-diameter connection hole for reversing the FREINO Z carabiner
- Extremely light weight (240 g)
- The choice of aluminum to lighten the weight of the pulleys (replaceable components, D004CA00)
- Ultra-simplified shape to avoid jamming the descender in tight passages

The PETZL SIMPLE descender is compatible with semi-static ropes from 8.5 to 11 mm in diameter.

Caractéristiques

- Material : Aluminium
