PETZL CONNECT ADJUST ORANGE lanyard for via ferrata. Lightweight, durable and easy to use with VERTIGO WIRE-LOCK carabiners.

Description

Equipment for via ferrata must combine durability, sturdiness and reliability. PETZ's CONNECT ADJUST ORANGE lanyard is particularly suitable for people between 40 and 120 kilos (complies with EN 958: 2017). It is appreciated for its many advantages:

- Two elasticated strands with easy extension (adaptable to different body sizes)
- A very compact tear-off absorption system, patented by Petzl
- A short rope, ideal for hooking onto a rung
- Reduced bulk when walking, thanks to the equipment's short connection
- VERTIGO WIRE-LOCK carabiners with automatic locking, easy to grip
- Heavy-duty construction with retractable HDPE ropes and aluminum carabiners

The PETZ CONNECT ADJUST ORANGE lanyard comes with a protective zippered cover.

Lanyard length: from 67 cm to 97 cm.
Size of short section (without carabiner): 24 cm.
