PETZL CANYON GUIDE canyoning harness with integrated protective pant. Great comfort and outstanding ergonomics, ideal for intensive use.

### Description

Do you love canyoning? Are you looking for equipment specially designed for independent canyoning enthusiasts and instructors? PETZL's CANYON GUIDE harness offers great comfort and optimized equipment organization. It's perfect for intensive use.

- Comfortable abseiling thanks to the ergonomic, openable ventral attachment point in the upper position (simplified descender connection).
- Large, semi-rigid belt for excellent support
- DOUBLEBACK buckles for quick harness adjustment
- Color-coding similar to that of the CANYON CLUB harness to facilitate demonstrations
- Four pre-shaped gear loops and four loops for various equipment and lightweight bags
- A loop below the ventral attachment point, ideal for attaching a heavy bag, making a deviation or picking up a person in an emergency
- High-quality protective pants, designed to protect the suit and harness straps from abrasion
- Long-lasting DOUBLEBACK buckles made of stainless steel (corrosion- and impact-resistant material)
- A protective sheath on each equipment carrier
- Easy control of the harness thanks to individual identification cardboard box

The PETZL CANYON GUIDE harness is available in two sizes to suit different body shapes. The protective panty is available as an accessory in three colors: green, orange or black.

#### Size 1

Waist: 65-95 cm, thigh: 40-65 cm, weight: 870 g

#### Size 2

Waist: 75-120 cm, thigh: 40-75 cm, weight: 920 g
