PETZL NEOX belay device with cam-assisted locking, specially designed for lead climbing and top-roping. Ideal for perfectly controlled descents.

Description

Lead climbing or top-roping: safety or nothing! PETZL's NEOX belay device is an essential piece of climbing equipment. This practical belay device has been specially designed for maximum belay comfort, ease of use and excellent descent control.

- Smooth sliding of the rope thanks to the wheel incorporated in the belay device, for easier slack setting.
- Cam-assisted blocking for reliable belaying in the event of a fall, or for a safe resting position.
- Markings on the belay device for easy rope placement
- Comfortable grip
- Ergonomic handle for easy rope release
- Handle multiplied by 3 (optimized control of rope movement on small diameters and reduced effort on the handle for large diameters)
- Environmentally-friendly design using recycled polyamide

PETZL's NEOX belay device is compatible with dynamic single ropes between 8.5 and 11 mm. It is especially optimized for diameters from 8.9 to 10.5 mm.

Available in three colors: light gray, black and orange.
