PETZL ACTIK CORE headlamp with rechargeable battery and mixed beam. Powerful light with 600 lumens, three white light levels and one red light.

## Description

Do you like running at night? For that, you need a headlamp that's both practical and powerful. PETZL's ACTIK CORE headlamp is just the thing for (very) dynamic activities! Not least thanks to its mixed beam, which is both wide and focused, so you can see your feet well while still having plenty of depth. But it offers many other advantages for your outdoor outings.

- High intensity (600 lumens), low weight (88 grams)
- Three levels of white light: MAX BURN TIME (100-hour runtime on battery), STANDARD (best power/runtime ratio with 7-hour runtime on battery) and MAX POWER (2-hour runtime)
- Fixed red light (60-hour runtime) for better visibility in the dark and to avoid dazzling others, plus flashing light (400-hour runtime possible)
- A single button to change the type of lighting
- A base plate designed to direct the light in the desired direction with ease
- Battery level indicator, visible when the light is switched on and off
- Rechargeable battery with micro USB type B plug (saves 900 batteries)
- Glow-in-the-dark reflector for easy identification in the dark
- LOCK function to prevent accidental switch-on
- IPX4 waterproofing (resistant to water splashes)
- A reflective headband that can be removed for washing
- Possibility of converting the lamp into a lantern thanks to the storage pouch
- HYBRID CONCEPT design with operation on rechargeable CORE battery or three AAA/LR03 batteries (not included)

PETZL's ACTIK CORE headlamp can be fitted to HELMET ADAPT and BIKE ADAPT 2 bindings. Handy for subsequent installation on your bike helmet or handlebars! Please note, however, that the lamp cannot be used in areas subject to traffic regulations. You'll need to equip yourself with compulsory bicycle lights.

Battery compatibility: alkaline, lithium or rechargeable Ni-MH.

## Caractéristiques

- Weight : 88 g
- Certification : CE
