PETZL LASER ice broach with three-pronged bit. Lightweight, ergonomic, high-performance mountaineering equipment for easy ice sessions.

Description

The ice screw is a must-have for safety during mountaineering sessions and glacier activities. Practical, lightweight and easy to use, it can be used to efficiently perforate ice to create a progression point, a belay point or a relay point. PETZL's LASER ice screw is the perfect companion for all your outings.

Simplified priming

- Innovative bit design with three teeth for easy ice priming
- Ergonomic design for a good grip
- Fast screwing, thanks to a well-thought-out leg design

Ultra-sturdy, reliable equipment

- Steel tube design, a very strong, shock-resistant material
- An ultra-light, ultra-strong aluminum alloy leg

The LASER ice broach is also easier to sharpen, thanks to a patented bit sharpening reserve.

Available in three sizes: 13 cm (120g), 17 cm (135g) and 21 cm (153g).

Caractéristiques

- Materials : acier, aluminium
- Certifications : CE EN 568, UKCA, UIAA 151
