PETZL DUO S HEADLAMP

https://www.securhit.com/en/headlamps/748-lampe-frontale-rechargeable-petzl-duo-s.html

PETZL DUO S ultra-powerful 1100 lumen caving headlamp. Waterproof and rechargeable, ideal for underground exploration, with FACE2FACE anti-glare function.

Description

Do you enjoy underground exploration? Then you need special equipment to see properly in the dark. PETZL's DUO S caving headlamp ensures long hours of discovery. Ultra-powerful with 1100 lumens in boost mode, it also brings other advantages to your caving outings!

The right light for underground activities

- 5 different types of lighting: low-intensity wide-beam, mixed for good close-up vision, mixed with a focused component for easy orientation, more powerful mixed to see farther, and very focused to see a very long way.
- 1100 lumen BOOST mode for excellent lighting performance

Practical equipment

- High impact resistance
- Waterproof to a depth of 1 metre for 30 minutes in freshwater, and to a maximum depth of 3 metres for 10 minutes when passing through siphons
- FACE2FACE anti-glare function (if another person with a DUO lamp is facing you, brightness is automatically reduced)
- A headband that's easy to adjust and remove for washing

Battery operation

- 3200 mAh Lithium-Ion battery rechargeable in 4 hours via 110/240 V rapid charger (included)
- Gauge for checking charge level

Ergonomic design

- Easy-to-use rotary knob
- Automatic lock to prevent accidental switch-on
- Switch to reserve mode when the battery is almost flat
- Pleasant to wear thanks to the energy box on the back of the head

The PETZL DUO S lamp fits all helmets thanks to the PRO ADAPT self-adhesive plates available as accessories.
