# PETZL FREINO CARABINER

*https://www.securhit.com/en/carabiners-and-connectors/754-mousqueton-alliage-automatique-freino-petzl.html*

PETZL FREINO carabiner with braking lug for descender. Ideal for adjusting braking during descents with single ropes. Automatic locking.

## Description

Safe descents require special equipment. PETZL's FREINO carabiner is specially designed for single ropes, when abseiling or windmilling. Features:

- Superior friction for single ropes, without the need for other equipment
- Extremely easy to use, as the rope can be installed or removed from the braking lug with one hand.
- TWIST-LOCK automatic locking device
- Keylock system (locking without a beak on the carabiner)

The PETZL FREINO carabiner can be used with a single rope with the STOP, GRIGRI, HUIT, HUIT ANTIBRULURE and SIMPLE.

Long axis strength: 25 kN
Short axis resistance: 10 kN
Open finger resistance: 9 kN
Finger opening: 15 mm
Finger opening for pin: 12 mm

## Caractéristiques

- Material : Aluminium

- Certifications : CE EN 362, CE EN 12275 type B, UKCA, UIAA, GB/T 23469 / B
