PETZL ROCPEC PAD

https://www.securhit.com/en/anchors-and-tie-back-systems/759-tamponnoir-rocpec.html

PETZL ROCPEC pad for use with SDS drill bits. Ideal for artificial climbing to drill holes of different sizes and diameters without a drill.

Description

A very useful accessory for artificial climbing, for setting temporary or permanent anchor points? PETZL's ROCPEC is an ideal hand tool for drilling holes in rock. You can then insert pitons, spits and other types of anchoring points required for progress or safety in artificial climbing.

The advantages of PETZL's ROCPEC rock drill?

- Quick and easy drilling of holes of different diameters and depths, for all types of anchoring.
- Easy drill mounting and dismounting, without the use of tools

The black pad for SDS drills combines the advantages of manual drilling with the robustness of SDS drills.

Caractéristiques

- Weight : 198 g
