PETZL BONGO rock hammer for pitonnage and dépitonnage. An efficient and precise tool for adventure terrain, artificial climbing and equipment.

Description

A pitonning hammer is an essential accessory for climbers who practice both artificial and traditional climbing. It is designed to be robust, precise and efficient. Climbing enthusiasts use it to install and remove pitons in a variety of rock environments. PETZL's BONGO hammer combines several advantages to make your climbing sessions easier!

- A rubber handle designed to limit vibrations
- A handle with a hole for threading a cord
- A drilled head for connecting a chain
- Curved head shape for easy dépitonnage
- Fast, secure piton installation
- Ultra-strong materials to ensure long tool life

This tool will become an essential part of your climbing equipment.
